BESPOKE DESIGNS ON TRADITIONAL PAINTS

STYLISH INTERACTION

Italian paints are combined with customized design or individual branding – these are the core elements of an innovation called dimax®paint.

Dimax® paint refers to a new opportunity for surface and design looks now available by combining paint colours and dimax® printing techniques with digital printing technology. Glossy, reflective, mat or rough finishes represent a broad range of paints and are the perfect base for any subsequent print. Decors adapted in colours and style as well as the logo can be printed on top of the paint surface and give the ideal finish.

The paint options consist of using five different techniques and styles with an extensive colour palette available. The colours are painted on flame retardant synthetic boards or wallpapper and subsequently printed with dimax® digital printing technology.

Once finished, boards can be cut easily with a knife or saw or wallpaper applied to the wall as usual. Both dimax® paint and dimax® print are able to be washed .

TECHNICAL DETAILS:

wallpaper:

width: 105 cm or 150 cm

flame retardant: B1

installation: the printed wallpaper will be glued to the wall

boards:

thickness: 1, 2, 3, 4 mm

size: maximum of 205 x 305 cm

flame retardant: B1

installation: the printed boards will be glued or screwed or fixed in profiles

INNOVATION IN SHOP DESIGN

individual ... elegant ... fashionable ...

Dimax®paint boards put emphasis on an outstanding shop fit out due to the numerous options of colours, decors and branding opportunities. Our design team is pleased to assist you in 3D visualisations and room concepts to facilitate your decisions.

SHOPPING EXPERIENCE

Dimax@paint boards are particularly suitable for back walls in display cases, cupboards or presentation tables. Furthermore, they can be perfectly applied as wall claddings or partitions. We are developing concepts to endorse your brand which is why we adapt the wall design to the general shop concept. Shopping will become a real experience.

FANCY FURNITURE

Elegant and modern materials build the base for fancy furniture ideas. Dimax® paint represents one of these materials.

The 3mm thick and flexible panels can be applied easily on walls, as backpanels or integrated in furniture pieces. The combination of Italian paint and digital print can be considered as an innovation and are therefore the perfect opportunity to create modern and sophisticated interior decorations. Please have a look at our decor data base on www.glasdecor.org to get some impressions or contact our design team for fancy solutions.

Due to the bending characteristic, the panels are perfectly suitable for furniture. Italian paint technique combined with customized furniture manufacturing is absolutely unusual and extraordinary.

dimax[®]paint IN A NUTSHELL

1) Choose colour and style: The Italian paint is available in five painting techniques which differ in surface structure and reflections. Within these style options you can select your favorite look from a broad range of colours.

2) Choose additional design: Once finished with the painting details, choose your added value decor and your personalised artwork is ready for implementation.

SHARAZADE

The glossy style. Sharazade benefits from its glossy impression. The surface is structured and pretends a sandy look.

SETTEVELI

The structured style. Smooth sand structure and a mix out of semi-mat and glossy tone transmit an antique look of high value.

MADREPERLA

The pearl style. As the name already reveals Madeperla seems to be a pearl. Metallic reflection is the associating criteria that can be found throughout all colours. The surface is elegant and semi plane.

VEICOT PEARL

The attractive style. Innovative Renaissance? That is the perfect description for the Veicot Perl. A mix out of bright and dark as well as the semi-glossy effect create the perfect result.

FARBEL

The classical style. Fabel represents typical Italian trowel technique and has a classical plane and mat surface.

INSTALLATION

WALLPAPER:

The finished wallpaper will be glued to the wall. Although the wallpaper is cut to size, there will be an overlap between the panels to assure perfect match and seamless installation. Further, the dimax®paint is as washable as the traditional paint.

TECHNICAL DETAILS:

wallpaper:

width: 105 cm or 150 cm

flame retardant: B1

installation: the printed wallpaper will be glued to the wall. There will be no changes in wet installation.

BOARDS:

Boards can be cut easily with knife or saw. Further, the dimax®paint is as washable as the traditional paint.

thickness: 1, 2, 3, 4 mm

size: maximum of 205 x 305 cm

flame retardant: B1

installation: the printed boards will be glued or screwed or fixed in profiles
